## DISCOVER THE POWER OF PROVEN PERFORMANCE – BACKED BY KNOW2GROW™ RESEARCH

At Ohlde Seed, we're excited to introduce our 2026 lineup of corn hybrids, milo hybrids, and soybean varieties – each one is the result of rigorous, localized research through our **Know2Grow™ Research Program**.

Our approach goes far beyond simply selecting seed. We partner with you to deliver yields **Rooted in Research<sup>SM</sup>**, backed by decades of agronomic insight and real-world testing in soils and environments just like yours. That's what sets Ohlde Seed apart.

From early research to final recommendations, we've invested heavily in understanding how the newest traits and technologies

perform under actual field conditions. Our close relationships with trait providers ensure you receive timely access to the latest innovations – tailored to fit your operation's unique yield goals and growing conditions.

As you prepare for the 2026 season, count on the Ohlde Seed team to be by your side – offering insights, recommendations, and dependable performance. With Ohlde Seed, you don't just get seed – you get a plan built for your success.

**Let's grow forward – together.**

# SOIL SPECIFIC SEED VARIETIES

**OHLDE SEED'S  
KNOW2GROW™  
RESEARCH  
PROGRAM HAS  
THE ANSWERS.**

## **KNOW2GROW™ PROVIDES OHLDE CUSTOMERS 3 KEY BENEFITS:**

- 1.** Provides FIRST HAND KNOWLEDGE of the hybrid or variety's true performance and characteristics.
- 2.** Identifies the best performing hybrids and varieties in YOUR YIELD ENVIRONMENT.
- 3.** Ensures you can have the BEST OPTIONS to benefit your farm.

**OHLDE  
KNOW2GROW™**

From a technology perspective, without a Know2Grow™ Research Program, the value of using auto-steer, variable rate application, field mapping, yield monitoring, or application timing are all greatly diminished if you do not make the right choice first. Rely on the Ohlde Seed Know2Grow™ Program to select a locally researched seed, engineered to thrive in your specific field and soil conditions.

## KNOW2GROW™ RESEARCH PROGRAM – REAL-WORLD TESTING FOR REAL RESULTS

At Ohlde Seed, research isn't just a box we check — it's the foundation of everything we recommend. Our Know2Grow™ Research Program is designed to answer the tough questions growers face every season and deliver dependable, data-driven results tailored to your specific conditions.

### TESTED WHERE YOU FARM

- Our Know2Grow™ plots are strategically located across a wide range of environments — from Kansas into southern Nebraska and northern Oklahoma. This geographic diversity gives us the ability to evaluate hybrid and variety performance in multiple yield environments and soil types, so we can confidently match the right products to your fields.

### REPLICATED TRIALS, NOT JUST STRIPS

- While many competitors rely on strip trials that span multiple acres and are affected by field variability, we take a more precise approach. Our replicated research plots test hundreds of hybrids and varieties in condensed, consistent layouts. This reduces variability, increases data accuracy, and delivers insights you can trust.

### ADVANCED PLANTING TECHNOLOGY

- Know2Grow™ uses cutting-edge technology from SRES, the world's largest research plot planter manufacturer. This planter ensures uniform seed placement, accurate population trials, and controlled comparisons. By testing multiple population rates, we uncover the performance thresholds of each hybrid or variety — helping you maximize return on every acre.

### FIELD-TESTED SOLUTIONS FOR YOUR FARM

- Know2Grow™ is more than data collection — it's problem-solving. Our team uses this research to identify how products respond to real-world challenges. Whether it's drought tolerance, disease resistance, or standability, we can recommend products that directly address your field's specific concerns.

Wherever you farm, Know2Grow™ brings the insights, tools, and confidence you need to make the most of every acre.

**Rooted in Research<sup>SM</sup>.**

### Research Program

- Current testing area
- Expansion area

### HELPING YOU ANSWER THE BIG QUESTIONS

Our research program helps evaluate performance on the traits and conditions that matter most:

- Drought Tolerance
- Emergence & Plant Height
- Gray Leaf Spot & Goss's Wilt
- SDS & Phytophthora Tolerance
- Population Response
- Flex vs. Determinate Ear Type
- pH Sensitivity & Soil Challenges
- Corn-on-Corn Performance
- Standability & Stay-Green
- Seed Treatments & Fertility Programs
- Silage & Grain Quality
- STS Tolerance
- Southern Rust & Disease Pressure

# “We look forward to this upcoming season.”

No dicamba may be used in-crop with seed with Roundup Ready® Xtend Technology, unless and until approved or specifically permitted, and no dicamba formulations are currently registered for such use in the 2025 season. Please follow [www.roundupreadyxtend.com/pages/xtendimax-updates.aspx](http://www.roundupreadyxtend.com/pages/xtendimax-updates.aspx) for status updates. Dicamba may harm crops that are not tolerant to dicamba.

Bayer is a member of Excellence Through Stewardship® (ETS). Bayer products are commercialized in accordance with ETS Product Launch Stewardship Guidance, and in compliance with Bayer's Policy for Commercialization of Biotechnology-Derived Plant Products in Commodity Crops. Commercialized products have been approved for import into key export markets with functioning regulatory systems. Any crop or material produced from this product can only be exported to, or used, processed or sold in countries where all applicable regulatory approvals have been granted. It is a violation of national and international law to move material containing biotech traits across boundaries into nations where import is not permitted. Growers should talk to their grain handler or product purchaser to confirm their buying position for this product. Excellence Through Stewardship® is a registered trademark of Excellence Through Stewardship.

ALWAYS READ AND FOLLOW PESTICIDE LABEL DIRECTIONS.

It is a violation of federal and state law to use any pesticide product other than in accordance with its labeling. NOT ALL formulations of dicamba or glyphosate are approved for in-crop use with Roundup Ready 2 Xtend® soybeans. NOT ALL formulations of dicamba, glyphosate or glufosinate are approved for in-crop use with products with XtendFlex® Technology. ONLY USE FORMULATIONS THAT ARE SPECIFICALLY LABELED FOR SUCH USES AND APPROVED FOR SUCH USE IN THE STATE OF APPLICATION. Contact the U.S. EPA and your state pesticide regulatory agency with any questions about the approval status of dicamba herbicide products for in-crop use with products with XtendFlex® Technology.

B.t. products may not yet be registered in all states. Check with your seed brand representative for the registration status in your state.

Refuge seed may not always contain the DroughtGard® trait. IMPORTANT IRM INFORMATION: Certain products are sold as RIB Complete® corn blend products, and do not require the planting of a structured refuge except in the Cotton-Growing Area where corn earworm is

a significant pest. Products sold without refuge in the bag (non-RIB Complete) require the planting of a structured refuge. See the IRM/ Grower Guide for additional information. Always read and follow IRM requirements.

Roundup Ready® Technology contains genes that confer tolerance to glyphosate. Roundup Ready® 2 Technology contains genes that confer tolerance to glyphosate. Roundup Ready 2 Xtend® soybeans contain genes that confer tolerance to glyphosate and dicamba. Products with XtendFlex® Technology contains genes that confer tolerance to glyphosate, glufosinate and dicamba. Plants that are not tolerant to glyphosate may be damaged or killed if exposed to those herbicides. Plants that are not tolerant to glyphosate, dicamba, and/or glufosinate may be damaged or killed if exposed to those herbicides. Plants that are not tolerant to dicamba may be damaged or killed if exposed to those herbicides. Contact your seed brand dealer or refer to the Bayer Technology Use Guide for recommended weed control programs.

Insect control technology provided by Vip3A is utilized under license from Syngenta Crop Protection AG. Herculex® is a registered trademark of Dow AgroSciences LLC. Agrisure Viptera® is a registered trademark of a Syngenta group company. LibertyLink logo® and LibertyLink® are trademarks of BASF Corporation. Respect the Refuge and Corn Design® and Respect the Refuge® are registered trademarks of National Corn Growers Association. Acceleron®, DroughtGard®, RIB Complete®, Roundup Ready 2 Technology and Design®, Roundup Ready 2 Xtend®, Roundup Ready 2 Yield®, Roundup Ready®, SmartStax®, Trecepta®, VT Double PRO®, VT4PRO™ and XtendFlex® are trademarks of Bayer Group.

Seed containing a patented trait can only be used to plant a single commercial crop. It is unlawful to save and replant Roundup Ready 2 Yield® soybeans, Roundup Ready 2 Xtend® soybeans, and XtendFlex® soybeans. Additional information and limitations on the use of these products are provided in the Technology Stewardship Agreement and the Bayer Technology Use Guide: [tug.bayer.com](http://tug.bayer.com). U.S. patents for Bayer technologies can be found at the following webpage: [cs.bayerpatents.bayer.com](http://cs.bayerpatents.bayer.com)

**YieldGard  
VT PRO**

YieldGard VT Pro® is a registered trademark used under license from the Bayer Group.

Before opening a bag of seed, be sure to read, understand and accept the stewardship requirements, including applicable refuge requirements for insect resistance management, for the biotechnology traits expressed in the seed as set forth in the technology agreement that you sign. By opening and using a bag of seed, you are reaffirming your obligation to comply with the most recent stewardship requirements.

# CORN

## OUR CORN HYBRIDS

At Ohlde Seed, we pride ourselves in bringing you the latest global trait technologies and delivering them in a hybrid that will excel in the soils on your farming operation.

### OHLDE NUMBERING SYSTEM (EXAMPLE)

**O 36-05**

TRAIT YEAR MATURITY

**First digit** = Trait (in this case, PowerCore)  
**Second digit** = Year of hybrid release (2026)  
**Last 2 digits** = Maturity (105 days)

### RATINGS

|          |               |         |          |               |   |   |   |   |

## KNOW2GROW<sup>™</sup> OBSERVATIONS

- › Large, girthy, flex style ear that adapts well to wide range of populations
- › Robust hybrid with good plant and ear height for a 98 day maturity
- › This is a broad adaptability hybrid that works in a wide geography and soil types
- › Provides excellent silage quality and tonnage

## GENERAL CHARACTERISTICS

|                 |    |
|-----------------|----|
| Maturity (Days) | 98 |
| Plant Height    | 3  |
| Ear Height      | 2  |
| Ear Type        | SF |
| Root Strength   | 2  |
| Stalk Strength  | 3  |
| Plant Canopy    | 3  |

## KNOW2GROW™ OBSERVATIONS

- › 114 day hybrid that gives you the PowerCore trait option
- › Excellent ear flex on a big robust plant style that likes heat and moderate populations
- › Very good disease package, good stalks with average roots
- › Great all around hybrid that is a work horse with great top end potential
- › Displays excellent plant canopy with high tolerance to Southern Rust
- › Excellent silage product for quality and tonnage

## GROWING REGION

**XTENDFLEX<sup>®</sup>**  
SOYBEANS

Seeds containing the PowerCore<sup>®</sup> Enlist<sup>®</sup>, PowerCore<sup>®</sup> Enlist<sup>®</sup> Refuge Advanced<sup>®</sup>, and Enlist<sup>®</sup> Corn - REFUGE traits are protected under one or more U.S. patents which can be found at: [www.traitstewardship.com](http://www.traitstewardship.com). The purchase of this traited seed includes a limited license to produce a single crop in the United States. The use of seed from such a crop and/or the progeny thereof for propagation or seed multiplication or for production or development of a hybrid or different variety of seed is strictly prohibited. You acknowledge and agree to be bound by the terms and conditions of the following documents in effect at the time of planting of this seed: (i) the Corteva Agriscience Technology Use Agreement and (ii) the Product Use Guides for all technologies in this seed, including the Herbicide Resistance Management (HRM), and Use requirements.

To plant PowerCore Enlist, PowerCore Enlist Refuge Advanced, and Enlist Corn - REFUGE seed, you must have a limited license from Corteva Agriscience (or other appropriate affiliates). In consideration of the foregoing, Corteva Agriscience grants to the Grower a limited license to use its technology to produce only a single commercial crop in the United States under the terms and conditions set forth in the Technology Use Agreement in effect at the time of planting of this seed.

IRM - Properly managing trait technology is key to preserving it as a long term crop protection tool. Growers who fail to comply with IRM requirements risk losing access to this product. To help preserve the effectiveness of B.t. corn technologies, growers planting B.t. corn technologies are required to follow an IRM Plan. Consult the Corn Product Use Guide for appropriate refuge configuration options. Before opening a bag of seed, be sure to read, understand and accept the stewardship requirements, including applicable refuge requirements for insect resistance management, for the biotechnology traits expressed in the seed as set forth in the Technology Use Agreement and Product Use Guide. By opening and using a bag of seed, you are reaffirming your obligation to comply with the most recent stewardship requirements. For complete details on IRM requirements for hybrids with B.t. technology, including refuge examples and important information on the use of insecticides on refuge and B.t. corn acres, please consult appropriate Product Use Guide. Go to [www.corteva.us/Resources/trait-stewardship.html](http://www.corteva.us/Resources/trait-stewardship.html) to download the latest Corteva Agriscience Corn Product Use Guide.

Enlist E3<sup>®</sup> soybean seeds containing the Enlist<sup>®</sup> trait can only be used to plant a single commercial crop. It is unlawful to save and replant Enlist E3<sup>®</sup> soybeans. Additional information and limitations on the use of these products are provided in the Corteva Agriscience Technology Use

Agreement and Enlist<sup>®</sup> Soybean Product Use Guide. U.S. patents for Corteva Agriscience technologies can be found at the following webpage: [www.corteva.us/Resources/trait-stewardship.html](http://www.corteva.us/Resources/trait-stewardship.html).

Corteva Agriscience is a member of ExcellenceThrough Stewardship<sup>®</sup> (ETS). Corteva Agriscience products are commercialized in accordance with ETS Product Launch Stewardship Guidance and in compliance with the Corteva Agriscience policies regarding stewardship of those products. In line with these guidelines, Corteva Agriscience's product launch process for responsible launches of new products includes a long-standing process to evaluate export market information, value chain consultations, and regulatory functionality. Growers and end-users must take all steps within their control to follow appropriate stewardship requirements and confirm their buyer's acceptance of the grain or other material being purchased. For more detailed information on the status of a trait or stack, please visit [www.biotradestatus.com](http://www.biotradestatus.com).

Following burndown, Enlist Duo<sup>®</sup> and Enlist One<sup>®</sup> herbicides with Colex-D<sup>®</sup> technology are the only herbicides containing 2,4-D that are authorized for preemergence and postemergence use with Enlist<sup>®</sup> corn and soybeans. Consult Enlist<sup>®</sup> herbicide labels for weed species controlled. Enlist Duo and Enlist One herbicides are not registered for use or sale in all states and counties; are not registered in AK, CA, CT, HI, ID, MA, ME, MT, NH, NV, OR, RI, UT, VT, WA and WY; and have additional subcounty restrictions in AL, GA, TN and TX, while existing county restrictions still remain in FL. All users must check "Bulletins Live! Two" no earlier than six months before using Enlist One or Enlist Duo. To obtain "Bulletins", consult [epa.gov/espp/](http://epa.gov/espp/), call 1-844-447-3813, or email [ESPP@epa.gov](mailto:ESPP@epa.gov). You must use the "Bulletin" valid for the month and state and county in which Enlist One or Enlist Duo are being applied. Contact your state pesticide regulatory agency if you have questions about the registration status of Enlist<sup>®</sup> herbicides in your area. ALWAYS READ AND FOLLOW PESTICIDE LABEL DIRECTIONS. IT IS A VIOLATION OF FEDERAL AND STATE LAW TO USE ANY PESTICIDE PRODUCT OTHER THAN IN ACCORDANCE WITH ITS LABELING. ONLY USE FORMULATIONS THAT ARE SPECIFICALLY LABELED FOR SUCH USE IN THE STATE OF APPLICATION. USE OF PESTICIDE PRODUCTS, INCLUDING, WITHOUT LIMITATION, 2,4-D-CONTAINING PRODUCTS NOT AUTHORIZED FOR USE WITH ENLIST CORN AND SOYBEANS, MAY RESULT IN OFF-TARGET DAMAGE TO SENSITIVE CROPS/AREAS AND/OR SUSCEPTIBLE PLANTS, IN ADDITION TO CIVIL AND/OR CRIMINAL PENALTIES. Additional product-specific stewardship requirements for Enlist crops, including the Enlist Product Use Guide, can be found at [www.traitstewardship.com](http://www.traitstewardship.com).

POWERCORE<sup>®</sup> is a registered trademark of Bayer Group. POWERCORE<sup>®</sup> multi-event technology developed by Corteva Agriscience and Bayer Group. Liberty<sup>®</sup>, LibertyLink<sup>®</sup> and the Water Droplet Design are registered trademarks of BASF. Roundup<sup>®</sup> and Roundup Ready<sup>®</sup> are registered trademarks of Bayer Group. Always follow IRM, grain marketing and all other stewardship practices and pesticide label directions. B.t. products may not yet be registered in all states. Check with your seed representative for the registration status in your state. The transgenic soybean event in Enlist E3<sup>®</sup> soybeans is jointly developed and owned by Corteva Agriscience and M.S. Technologies, L.L.C.

## THE ENLIST™ WEED CONTROL SYSTEM FROM OHLDE SEED

Throughout our large territory, Ohlde Seed Farms has built a reputation on having the latest genetics and trait technologies available to their valued customers. The Enlist™ weed control system through the Field Forward™ program for Enlist soybeans is no exception. We have a full lineup of Enlist varieties that give producers another solid option when it comes to a comprehensive weed control program.

## ***YIELD. WEED CONTROL. FLEXIBILITY.***

You want high-yielding performance. And you need options for managing tough weeds. XtendFlex<sup>®</sup> soybeans offer proven performance and herbicide tolerance to dicamba, glyphosate and glufosinate.

### **YIELD**

Built on the proven performance of the high-yielding Roundup Ready 2 Xtend<sup>®</sup> soybeans for **outstanding agronomic performance.**

### **WEED CONTROL**

**Dicamba, glyphosate and glufosinate tolerance** gives you control over 337 weeds<sup>1</sup> and up to 14 days of soil activity on certain small-seeded broadleaf weeds from XtendiMax<sup>®</sup> herbicide with VaporGrip<sup>®</sup> Technology, a restricted use pesticide.<sup>2</sup>

### **FLEXIBILITY**

Choose the weed management strategy that suits you with **triple herbicide tolerance**, providing you with choice and flexibility in controlling tough weeds.

*See the latest at [RoundupReadyXtend.com/Results](http://RoundupReadyXtend.com/Results)*

<sup>1</sup> Based on approved EPA herbicide labels for the herbicides recommended for use in each system as of 10/28/2020.

<sup>2</sup> Results may vary, depending on rainfall and soil type. Always use dicamba with residual herbicides in pre-emergence and postemergence applications that have different, effective sites of action, along with other Diversified Weed Management Practices.

**Bayer is a member of Excellence Through Stewardship<sup>®</sup> (ETS).** Bayer products are commercialized in accordance with ETS Product Launch Stewardship Guidance, and in compliance with Bayer's Policy for Commercialization of Biotechnology-Derived Plant Products in Commodity Crops. Commercialized products have been approved for import into key export markets with functioning regulatory systems. Any crop or material produced from this product can only be exported to, or used, processed or sold in countries where all necessary regulatory approvals have been granted. It is a violation of national and international law to move material containing biotech traits across boundaries into nations where import is not permitted. Growers should talk to their grain handler or product purchaser to confirm their buying position for this product. Excellence Through Stewardship<sup>®</sup> is a registered trademark of Excellence Through Stewardship.

XtendiMax<sup>®</sup> herbicide with VaporGrip<sup>®</sup> Technology is part of the Roundup Ready<sup>®</sup> Xtend Crop System, is a restricted use pesticide and must be used with VaporGrip<sup>®</sup> Xtra Agent (or an equivalent vapor reducing agent). For approved tank-mix products (including VRAs and DRAs), nozzles and other important label information visit [XtendiMaxApplicationRequirements.com](http://XtendiMaxApplicationRequirements.com)

**ALWAYS READ AND FOLLOW PESTICIDE LABEL DIRECTIONS.** It is a violation of federal and state law to use any pesticide product other than in accordance with its labeling. NOT ALL formulations of dicamba, glyphosate or glufosinate are approved for in-crop use with products with XtendFlex<sup>®</sup> Technology. ONLY USE FORMULATIONS THAT ARE SPECIFICALLY LABELED FOR SUCH USES AND APPROVED FOR SUCH USE IN THE STATE OF APPLICATION. Contact the U.S. EPA and your state pesticide regulatory agency with any questions about the approval status of dicamba herbicide products for in-crop use with Roundup Ready 2 Xtend<sup>®</sup> soybeans or products with XtendFlex<sup>®</sup> Technology.

**Performance may vary**, from location to location and from year to year, as local growing, soil and weather conditions may vary. Growers should evaluate data from multiple locations and years whenever possible and should consider the impacts of these conditions on the grower's fields.

**Products with XtendFlex<sup>®</sup> Technology contains genes that confer tolerance to glyphosate, glufosinate and dicamba.** Glyphosate will kill crops that are not tolerant to glyphosate. Dicamba will kill crops that are not tolerant to dicamba. Glufosinate will kill crops that are not tolerant to glufosinate. Contact your seed brand dealer or refer to the Bayer Technology Use Guide for recommended weed control programs.

XtendiMax<sup>®</sup> is a restricted use pesticide. Not all products are registered in all states and may be subject to use restrictions. The distribution, sale, or use of an unregistered pesticide is a violation of federal and/or state law and is strictly prohibited. Check with your local dealer or representative for the product registration status in your state. ## ENLIST® WEED CONTROL SYSTEM— PROVEN CONTROL OF TOUGH WEEDS

Enlist Duo® and Enlist One® herbicides with Colex-D® technology are the only herbicides containing 2,4-D that are authorized for preemergence and postemergence use on Enlist® crops.

**SOYBEANS**   2,4-D choline   |   Glyphosate   |   Glufosinate

**CORN**   2,4-D choline   |   Glyphosate   |   Glufosinate   |   FOP Herbicides

- Convenient proprietary blend of 2,4-D choline and glyphosate
- The two sites of action work together to deliver control of yield-robbing weeds and help prevent resistance

- Straight-goods 2,4-D choline with additional tank-mix flexibility
- Provides additional tank-mix flexibility with Liberty® herbicide and other qualified tank-mix products, allowing for a customized weed control program to fit each farm

### On-Target Application

- 90% less drift than traditional 2,4-D
- 96% less volatile than 2,4-D ester

# 2234E

Rel. Maturity: 3.4

## Know2Grow™ OBSERVATIONS

- › Great emergence and will be quick out of the ground

## TRAIT TECHNOLOGY

## RECOMMENDED YIELD ENVIRONMENTS

# Think Before You Bin Run

**Verification Required** The last patent on the original Roundup Ready® soybean trait expired a few years ago and U.S. farmers may legally plant saved seed from some varieties of soybean containing the Roundup Ready® soybean trait. However, it is important that you check with your seed supplier to determine if a specific Roundup Ready® soybean variety is covered by other intellectual property rights, and if so, the policy for saving seed of that variety.

**Higher Seeding Rate** A higher seeding rate may be required for bin-run Roundup Ready® soybeans compared to new branded seed.

**Yield Loss** Roundup Ready 2 Yield® soybean, Roundup Ready 2 Xtend® soybean, and XtendFlex® soybean varieties typically have a higher yield opportunity than Roundup Ready® soybean varieties.

**Cleanout Loss** Loss of seed and/or shrink occurs during the seed cleaning and handling processes for bin-run seed.

**Seed Treatment Costs** Treating your seed will add costs—both the cost of the treatment and the application of that treatment.

**Lost Income** Every bushel of saved seed you plant is a bushel you're not selling as commodity grain.

**Increased Seed Management** If you plan to save and bin-run Roundup Ready® soybeans for planting, you will have to manage your harvest operations and grain storage so that the seed isn't co-mingled with other seed that's covered by intellectual property rights.

## High Value of New Branded Seed

### Latest Technology

- // High-yielding soybean technologies
- // Better variety options
- // Leading seed treatment options

### Customer Service

- // Dealer agronomic support before and after the sale
- // Replant policy support
- // Convenient packaging and delivery

### Reliable Germination and Quality

- // Rigorously tested and meets U.S. Federal Seed Act requirements
- // Free of seed-borne diseases
- // Properly stored and conditioned

Any crop or material produced from this product can only be exported to, or used, processed or sold in countries where all necessary regulatory approvals have been granted. It is a violation of national and international law to move material containing biotech traits across boundaries into nations where import is not permitted. Growers should talk to their grain handler or product purchaser to confirm their buying position for this product. Excellence Through Stewardship® is a registered trademark of Excellence Through Stewardship.

**ALWAYS READ AND FOLLOW PESTICIDE LABEL DIRECTIONS.** It is a violation of federal and state law to use any pesticide product other than in accordance with its labeling. NOT ALL formulations of dicamba or glyphosate are approved for in-crop use with Roundup Ready 2 Xtend® soybeans. NOT ALL formulations of dicamba, glyphosate or glufosinate are approved for in-crop use with products with XtendFlex® Technology. ONLY USE FORMULATIONS THAT ARE SPECIFICALLY LABELED FOR SUCH USES AND APPROVED FOR SUCH USE IN THE STATE OF APPLICATION. Contact the U.S. EPA and your state pesticide regulatory agency with any questions about the approval status of dicamba herbicide products for in-crop use with Roundup Ready 2 Xtend® soybeans or products with XtendFlex® Technology.

**Roundup Ready® Technology** contains genes that confer tolerance to glyphosate. **Roundup Ready® 2 Technology** contains genes that confer tolerance to glyphosate. **Roundup Ready 2 Xtend® soybeans** contain genes that confer tolerance to glyphosate and dicamba. **Products with XtendFlex® Technology** contain genes that confer tolerance to glyphosate, glufosinate and dicamba. **Glyphosate** will kill crops that are not tolerant to glyphosate. **Dicamba** will kill crops that are not tolerant to dicamba. **Glufosinate** will kill crops that are not tolerant to glufosinate. Contact your seed brand dealer or refer to the Bayer Technology Use Guide for recommended weed control programs.

Contact your Bayer retailer, refer to the Bayer Technology Use Guide, or call the technical support line at 1-888-283-6847 for recommended Roundup Ready® Xtend Crop System weed control programs.

## OHLDE NUMBERING SYSTEM (EXAMPLE)

**O 2465**

O = Ohlde Genetics

First digits = Year of hybrid released (2024)

Last 2 digits = Days to Mid Bloom (65 days)

YEAR      DAYS TO  
MID BLOOM

## RATINGS

**O 2460**

Medium-Early

## KNOW2GROW™ OBSERVATIONS

- › Medium-Short plant height with excellent stalk strength
- › Very tough rugged line that works best in the west
- › Has great tolerance to Sugar Cane Aphid
- › Place on your toughest acres
- › Great option for double crop milo

## PLANT TRAITS

## GENERAL CHARACTERISTICS

|                   |              |
|-------------------|--------------|
| Grain Color       | Red          |
| Head Type         | Intermediate |
| Drought Tolerance | 1            |
| High Yield        | 6            |
| Low Yield         | 1            |
| Days to Mid Bloom | 60           |
| SCA Tolerance     | Tolerant     |

**O 2461**

Medium-Early

## KNOW2GROW™ OBSERVATIONS

- › Cream Colored Hybrid that is well adapted for high stress environments
- › Excellent stalk strength
- › Strong low end yield performance and standability

## PLANT TRAITS

## GENERAL CHARACTERISTICS

|                   |              |
|-------------------|--------------|
| Grain Color       | Cream        |
| Head Type         | Semi Compact |
| Drought Tolerance | 1            |
| High Yield        | 5            |
| Low Yield         | 1            |
| Days to Mid Bloom | 61           |
| SCA Tolerance     | Tolerant     |

## O 2465 Medium

### KNOW2GROW™ OBSERVATIONS

- › Great seedling vigor that has shown strong field emergence
- › Medium plant height with very good head exertion
- › Consistent yielding hybrid that has the toughness needed for the low to medium yielding environments
- › Top of line stalk strength, excellent threshability, and a semi-open head makes harvesting this hybrid a breeze
- › Great Sugar Cane Aphid tolerance

### PLANT TRAITS

### GENERAL CHARACTERISTICS

|                   |                  |
|-------------------|------------------|
| Grain Color       | <b>Bronze</b>    |
| Head Type         | <b>Semi-open</b> |
| Drought Tolerance | <b>1</b>         |
| High Yield        | <b>2</b>         |
| Low Yield         | <b>1</b>         |
| Days to Mid Bloom | <b>65</b>        |
| SCA Tolerance     | <b>Tolerant</b>  |

## O 533 Early

### KNOW2GROW™ OBSERVATIONS

- › Brings excellent yield potential and strong stress tolerance
- › Early maturity that will stand well under stress with great head exertion
- › Displays a bronze, semi-open head
- › Will work in a double crop market as well with its early maturity
- › Outstanding results in Know2Grow™ performance trials

| Days to Mid Bloom | <b>60</b>          |
| SCA Tolerance     | <b>Susceptible</b> |

# O 570 Medium-Full

## KNOW2GROW™ OBSERVATIONS

- › Has displayed good Sugar Cane Aphid tolerance
- › Excellent top-end yield and test weight
- › Great option for irrigated and highly productive dryland acres
- › Very good stalks and roots for a moderately tall hybrid
- › Provides exceptional threshability for harvesting ease

## PLANT TRAITS

## GENERAL CHARACTERISTICS

|                   |          |

| Head Type         | Compact  |
| Drought Tolerance | 5        |
| High Yield        | 1        |
| Low Yield         | 5        |
| Days to Mid Bloom | 71       |
| SCA Tolerance     | Tolerant |

# SORGHUM SUDAN

## Sugar Sweet

## KNOW2GROW™ OBSERVATIONS

- › Extra fine stalks with fast regrowth for top-notch sudan production
- › BMR-6 gene for extra feeding value that cows love to eat
- › This product works extremely well for haying and grazing with its quick growth and fine stems
- › Male sterile

## PLANT TRAITS

## GENERAL CHARACTERISTICS

|                |   |                   |   |
|----------------|---|-------------------|---|
| Plant Height   | 3 | Silage Potential  | 5 |
| Stalk Strength | 2 | Grazing Potential | 1 |
| Tonnage        | 1 | Regrowth          | 1 |

## FORAGES

# O 114 112-114 Day

## KNOW2GROW™ OBSERVATIONS

- › One of the best sorghum silage products on the market – will equal corn feeding values
- › 6-8 feet tall with great stalk quality for standability
- › Leafy product that loads up with grain for tonnage
- › Full season type product, plant before June 10th for best results

Ohlde Seed Farms is pleased to offer John Deere Financial financing options for the 2026 planting season. John Deere Financial is a dependable source of credit for approved accounts. Over 500,000 farmers and ranchers throughout the United States use John Deere Financial.

### Using financing from John Deere Financial offers the following benefits:

- Flexible financing needs for everyday essentials and seasonal inputs
- Consolidated agriculture purchases on one account
- Instant online access at MyJDFAccount.com

For more information about this program and other dependable financing solutions, please contact John Deere Financial at 1-800-356-9033 or visit [www.JohnDeereFinancial.com](http://www.JohnDeereFinancial.com).

### Ohlde Seed Farms is offering you the following John Deere Financial financing options for the 2026 planting season:

- **0% Fixed Rate Seasonal Terms** – Ohlde Seed Farms offers customers a No-Payment, No-Interest, 0% fixed interest rate. No cash discounts apply. Payment in full is due by December 2026. This program is offered until February 15, 2026.
- **Regular Purchase** – Offered by Ohlde Seed Farms for your everyday seed purchasing. Pay your monthly balance in full and accrue no finance charge or stretch your cash flow and make minimum monthly payments. Use for regular payments throughout the year.
- **120-day Interest Free Seasonal Terms** – Ohlde Seed Farms offers 120 days with no interest. Best for short-term financing needs. Interest does not begin to accrue until after the deferral period has expired. This program is offered until March 15, 2026.

For additional financing options, please contact Ohlde Seed Farms. For more information about establishing a John Deere Financial account, call John Deere Financial at 1-800-356-9033 or visit their website at [www.JohnDeereFinancial.com](http://www.JohnDeereFinancial.com) to apply.
